EMERGENCY & IMPORTANT NUMBERS

TTY/TDD Users:

after your call is answered, pressing a TTY/TDD key several times may help to shorten the time necessary to respond to your call. Dial "0" (Operator) in any emergency and give the location, including city, where help is needed.

The steps that led to the birth of N.A.S. Corpus Christi began in 1938 by the 75th Congress. A second air training station was recommended; one that was capable of meeting an emergency demand for pilots.

The recommended location for this facility was specifically on the Corpus Christi Bay! N.A.S. Corpus Christi was commissioned by its first skipper, Captain Alva Berhard, on March 12, 1941. The first flight started on May 5, 1941; 800 instructors provided training for more than 300 cadets a month. The training rate nearly doubled after the bombing of Pearl Harbor.

Former President George H.W. Bush was in the third graduating class, June 1942 - the youngest cadet ever to graduate.

By the end of World War II, more than 35,000 aviators had earned their wings there. Corpus Christi was the only primary, intermediate and advanced training facility in existence in the United States. At one time, it was the largest pilot training facility in the world.

The following is a list of the types of aircraft you will find based at N.A.S. Corpus Christi:

VT-27 & VT-28 execute primary training in the T-34C Mentor, a single engine turbo-prop aircraft. VT-31 & VT-35 execute advanced training in the T-44A King Air and TC-12B Huron, a twin engine turbo prop aircraft.

Helicopter Mine Countermeasures Squadron Fifteen conducts its mine sweeping mission from the air with the MH-53E Sea Dragon. This mission is carried out by towing their mine seeking equipment throughout the seas.

Onboard you will also find the HH-65A "Dolphin" helicopter - the Coast Guard's primary Search & Rescue vehicle.
